

Job Sheet 5-2

Name _____ Date _____

Perform Starter Voltage Tests

Upon completion of this job sheet, you should be able to measure the battery voltage during cranking.

Tools and Materials

Safety glasses
Vehicle

Voltmeter

Describe the vehicle being worked on:

Year _____ Make _____ Model _____

PROCEDURE

For each step, the student will either provide a written response or check off a "task completed" box.

Perform a cranking voltage test using a voltmeter. Measure the voltage at the battery while cranking the engine. If the voltage is above 10.2 volts, the voltage is acceptable. Record the reading and observations in the following space. completed _____

Instructor's Response:
